Zexa Ultra Active Care Dishwashers

Ultra-Active Care removes stains and kills germs. It contains built-in sanitisers for hygienically clean crockery and utensils.

Non-dangerous and non-chlorinated, Ultra Active provides longer stability and shelf life. It is ideal for facilities with low usage rates.

Description:

Ultra-Active Care is a versatile, non-dangerous alkaline detergent. It has been created to meet the exacting demands our health care industry must meet.

Ultra-Active Care helps you comply with the "Guidelines for Food Service to Vulnerable Persons - A guide to Standard 3.3.1 - Food Safety Programs Chapter 3 of the Australia New Zealand Food Standards Code, February 2008". At the same time, it provides a safer alternative for the end user and the environment.

Formulated to remove stains and kills germs with its built-in sanitiser, the product delivers hygienically clean crockery and utensils. The non-dangerous, non-chlorinated formula provides longer stability and shelf life and is ideal for facilities with low usage rates.

Water conditioners and scale neutralisers ensure Ultra Active Care drastically reduces scale build and protects ware washing machines.

Finally, it is odourless and colourless. This makes it ideal for use in areas where skin or nose sensitivity is an issue.

Applications:

- For use in automatic dispensers of dishwashing machines in health care kitchen environments
- Used to ensure removal of stains and sanitisation of crockery and utensils used in health care facilities
- Compliance with ANZ Food Standards Code "Guidelines for Food Service to Vulnerable Persons"

Sizes:

- 5lt Containers
- 15lt Containers
